ABOUT ME

I'm a responsible, self-taught person with great research skills who always seeks to learn in any field. I like and support teamwork and interpersonal relationships for a pleasing working environment, besides, I adapt to it quickly.

In university, I have become familiar with several technologies, I have a wide knowledge of different programming languages and various database tools. I have made several software development projects and cybersecurity and software testing courses.

I'm excited about new challenges and environments, I have a great interest in expanding my knowledge by learning new technologies and also new cultures because I feel that I have a lot to provide to the company.
